

**CLAIM VERSIONS WITH MARKINGS TO SHOW  
CHANGES MADE**

Please amend claims 1-9 as follows:

1. (Once Amended) A method for a [ser] server to provide content to a client, the method comprising:

receiving a request from the client for one or more requested content items;  
identifying a data structure that refers to one or more further content items;  
modifying the data structure to reference the requested content items; and  
providing the content items referenced by the modified data structure.

2. (Once Amended) A method as recited in claim [0]1:  
wherein identifying the data structure, the data structure comprises a playlist;

wherein receiving the request, the one or more requested content items comprises streaming media content; and

wherein providing the content items further comprises streaming the content items referred to by the playlist.

3. (Once Amended) A method as recited in claim [0]1, wherein identifying the data structure, the data structure comprises a first Web page specification, and the requested content comprises a second Web page specification.

1           4.     (Once Amended) A method as recited in claim [0]1, wherein  
2     modifying the data structure further comprises adding a plurality of references to  
3     the requested content item in the data structure.

4  
5           5.     (Once Amended) A method as recited in claim [0]1, wherein  
6     modifying the data structure further comprises adding a plural number of  
7     references to the requested content item in the data structure, the number being  
8     indicated by the request.

9  
10          6.     (Once Amended) A method as recited in claim [0]1, wherein  
11     receiving the request, further comprises receiving a variety of requests from the  
12     client, at least one subset of the variety of requests comprising respective requests  
13     to one or more different content items.

14  
15          7.     (Once Amended) A method as recited in claim [0]1, wherein  
16     modifying the data structure, the data structure further comprises a placeholder  
17     that identifies a particular point in a sequence where the reference to the requested  
18     content is placed.

19  
20          8.     (Once Amended) A method as recited in claim [0]1, wherein  
21     identifying the data structure further comprises creating the data structure by  
22     modifying a base data structure.

REMARKS

No claims have been added. No claims have been canceled. Claims 1 has been amended to correct a grammatical error, and claims 2-8 have been amended to correct claim numbering. It is respectfully submitted that the pending claims are in condition for allowance, and action to that end is respectfully requested.

Respectfully Submitted,

Dated: 3/11/02
